MP Board

PROJECT

E-Learning Website
- Developed a responsive e-learning platform designed for college students to access recorded lectures and download study notes. The platform allows teachers from various colleges to upload lecture videos and materials.
- Built using frontend(Html , CSS, JavaScript) and backend(Node.js ,MySQL) technologies, the project includes robust database management to handle user roles, such as teachers and students, ensuring seamless content upload, access, and download functionality.

SWIGGY Database Management System
- Developed a database management system for Swiggy using Java, SQL, and JDBC.
- The project manages essential operations such as storing and retrieving customer details, restaurant menus, orders, and delivery information. Implemented features for efficient order tracking, user authentication, and database connectivity through JDBC to ensure seamless interaction between the application and the database.

SKILLS

Programming Language - Java ,HTML , CSS, JavaScript.
Database - MySQL.
Other - Data Structure , Object Oriented Programming ,Operating System.
Developer Tools - GitHub , Visual Studio Code , Linux(Ubuntu).

CERTIFICATIONS

Carrier Edge -Young Professional || TATA Consultancy Services
