SUMMERY

I am a software developer with experience in creating reliable web and mobile applications. I specialize in **JavaScript, React.js**, **Python**, and AWS, focusing on writing efficient code and solving technical challenges. My goal is to contribute technical skills and problem-solving abilities to a collaborative team.

EDUCATION

- **BTech GPA *7.56***   *2021-2025*
  Sagar Institute Of Technology and Research , Bhopal
- **12th (Secondary Education) ,Percent *90.2***   *2020-2021*
  Nalanda Higher Secondary School
- **10th (Secondary Education) ,Percent *89***   *2018-2019*
  Nalanda Higher Secondary School

INTERNSHIP

Development Intern   *09/2023-10/2023*
Codesoft

- Successfully completed hands-on training in Java programming and application development.
- Designed and implemented multiple projects, including **ATM Interface , Student Course Registration System .**
- Gained experience in problem-solving, object-oriented programming, and creating user-centric interfaces .

PROJECTS

Client Document Upload and Notification System-

- Is a web application built for allow clients to **register, upload important documents**, and receive **reminder notifications** before document expiry. The system includes.
- **Client/Admin login**
- **Secure document upload** with metadata (type, description, expiry date)
- **Document dashboard** with view, edit, delete options
- **Email and in-app reminders** for expiring documents
- Built using **React (frontend)**, **Node.js & Express (backend)**, and **MongoDB** for storage.

Two Good Co. Animated Website -

Technology used-HTML , CSS, JavaScript ,GSAP

- Developed two visually engaging and interactive animated websites using modern web technologies. Integrated GSAP to create smooth, **high-performance animations** and **scroll-based effects** for an immersive user experience. Focused on **responsive design**, clean UI/UX, and **performance optimization** across different screen sizes and devices.

SKILLS

Technical Skills
- **Programming Language-** Java ,HTML ,CSS , JavaScript.
- **Database-** MySQL, MongoDB.
- **Technologies-** Angular, Node.js , Express.js, Rest APIs.
- **Others-** Data Structure, OOPS, Optimized Problem Solving , Understanding of SDLC ,Test-Driven Development.

Hard Skills
- **Troubleshoot, debug,** and **resolve technical issues** within applications.
- Ensure the **reliability** and **performance** of software systems.
- Verify the **Software Designs** comply **with technical specifications**.
- Engage in all stages of the **software development lifecycle**, from conception through deployment.

Soft Skills
- **Works co-operatively** with others to achieve **team goals** and has a direct positive impact on **Software performance**
- **Articulate and Persuasive communicator** to the team.

CERTIFICATIONS

- **Certification of** – Carrier Young-Edge Profession Training
  Tata Consultancy Services
- **Certification of** –Linux Workshop
   Coding Thinker
- **Certification of** – Data Science Workshop
  Geeks of GuruKul
